Work Experience

Sin Riesgos SA (enero 2020-junio 2020)

Web Developer FullStack JR

My main function was to develop web applications that would manage and process the internal information of the company. Also develop applications for the automation of processes such as receiving databases and generating reports and invoices.

Hotel Hex (2018-2019)

Technical support

Provide assistance and perform maintenance to equipment and computer systems that may have failures. In this sense my responsibility included the installation, configuration and updating of hardware and software in addition to fixing any equipment failure.

Latin American Rally (2017)

I had the responsibility of developing together with my team, a prototype idea that solved the problem of non-reuse of thermoset plastic. Presenting as a solution the crushing of the plastic to later convert it into a mass that acts as a ceramic glue, creating tiles and platforms

Education

Systems engineering (2017-2020)

Universidad Politécnica de Nicaragua

Bachelor (2012-2016)

Gabriela Mistral
